

Please do not allow cell phone use on airplanes. I can imagine nothing worse than being forced to listen to scores of horrid conversations about people's private lives and businesses. No one is so essential and no conversation is so important that people need to talk on an airplane. Cell phones are great for making arrangements--but everyone can wait until they land, and cell phones are abused as it is. Imagine the cacophony! Flying is unpleasant enough these days. Don't allow it to be more unpleasant
